**PRESCOTT JOURNAL BUILDING AND GLASGOW HOUSE
EARLY 1920's**

Glasgow/Smyth Building
251 Water Street West

This limestone building composed of two identical sections joined by a distinctive arched carriageway was built about 1840 by Samuel Glasgow and Alexander Smyth, two of Prescott's early merchants. Glasgow used his western half as Gibson's Hotel during the 1850s. The structure is three storeys, of Georgian design, with a gable roof and dormers in the attic. The east wing was connected to the Smyth Building on King Street. It is the last remaining inn of the several Water Street inns dating from the days of the forwarding trade. The western section was renovated, and is designated under the Ontario Heritage Foundation. The entire structure is owned by the Morris and Taylor families of Prescott.

Along came young Brad Hubbard...
